**Event:** On 24 July 2024, a wildfire was located over a border area between Bulgaria and Greece, in the Slavyanka Mountain, a difficult-to-access mountainous terrain above 2 000 meters with hazard linked to an old minefield. Copernicus EMS Rapid Mapping is requested to provide wildfire extent mapping and monitoring.

**Data sources and analysis:** Pre-event image: Sentinel-2A/B (2024) (acquired on 16/07/2024 at 09:15 UTC, resolution 10.0 m). Post-event image: WorldView-2 © Maxar Technologies, Inc. (2024). (acquired on 08/08/2024 at 09:13 UTC, resolution 2.0 m). All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image by means of visual interpretation. Due to dense smoke, the burnt area delineation is not complete.

The current burnt area cumulates all burnt area extents from previous post-event products.
