Event: Two wildfires started in Viotia Regional Unit (Sterea Ellada Prefecture), 55 km northwest of Athens, on 31 July 2026 at 06:35 and 08:04, and the fires expanded rapidly due to strong northerly winds. Residents of Alikí, Agios Nikolaos and Agios Vasiliós had to be evacuated, and a 112 cell broadcast message was issued for this purpose. Ground forces (63 vehicles with 116 firefighters) and aerial means (12 helicopters and 6 airplanes) were used for fire suppression, assisted by municipality vehicles, machinery and volunteer organizations. Copernicus EMS Rapid Mapping is requested to provide initial rough estimation, fire extent and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: Sentinel-2 (2026) (acquired on 28/07/2026 at 09:06 UTC, resolution 10.0 m).
Post-event: Sentinel-2 (2026) (acquired on 02/08/2026 at 09:05 UTC, resolution 10.0 m).
All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image using a semi-automatic approach.

Due to dense smoke, the burnt area delineation is not complete.
