EMSR909 - AOI01
Wildfires in Viotia, Greece
VILIA

Situation as of 05/08/2026 09:20 UTC

Delineation MONIT04 - Overview map 01

Active Flames
4 No.
Burnt area
14,601.3 ha

Potentially affected population
~ 450

Potentially affected Built-up and Transportations

Road
210.9 km

Built-Up
65.1 ha

Crisis Information
- Active Flames
- Burnt area
- Previous burnt area

General Information
- Area of Interest
- Detail map

Administrative Boundaries
- Region

Built-Up Area
- Residential

Hydrography
- Lake, River

Facilities
- Long-distance pipelines or lines
- Local pipelines or lines
- Mining or extraction site
- Power plant
- Sport and recreation constructions
- Water or Aquatic infrastructure

Transportation
- Highway
- Main road
- Local road
- Track
- Railway
- Airfield runway
- Airfield
- Helipad

	Current	Forecast	
	Aug 05, 09:20 UTC	Aug 06, 09:20 UTC	Aug 07, 09:20 UTC
Wind direction and speed	23 km/h	26 km/h	19 km/h
Temperature and relative Humidity	32° 31%	30° 34%	31° 39%

Data retrieved from ECMWF on Aug 05, 09:20 UTC. Calculated at: 38.141°N, 23.181°E.

Event: Two wildfires started in Viotia Regional Unit (Sterea Ellada Prefecture), 55 km northwest of Athens, on 31 July 2026 at 06:35 and 08:04, and the fires expanded rapidly due to strong northerly winds. Residents of Aliki, Agios Nikolaos and Agios Vasilios had to be evacuated, and a 112 cell broadcast message was issued for this purpose. Ground forces (63 vehicles with 116 firefighters) and aerial means (12 helicopters and 6 airplanes) were used for fire suppression, assisted by municipality vehicles, machinery and volunteer organizations. Copernicus EMS Rapid Mapping is requested to provide initial rough estimation, fire extent and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: Sentinel-2 (2026) (acquired on 28/07/2026 at 09:06 UTC, resolution 10.0 m).
Post-event image: Sentinel-2 (2026) (acquired on 05/08/2026 at 09:20 UTC, resolution 10.0 m).
This image is used as background image.

The thematic layer has been derived from post-event satellite image using a semi-automatic approach.

The current burnt area cumulates all burnt area extents from previous post-event products.

Map produced by Telespazio Iberica released by e-GEOS on the 05/08/2026.

Access to the portal

Data Access:

All data displayed on the map(s), as well as Land Use - Land Cover layer(s),
are available in the Crisis Information Package and the Base Layer Package (for reference data).
The table above is available in editable format in the Crisis Information Package.
All products and data are also available for download on the portal.

Estimated Population:

Estimated population is based on Copernicus Global Human Settlement Layer (GHSL) dataset.
Additional population datasets and analysis are available in the summary table.
