	Current	Forecast	
	Sep 09, 05:36 UTC	Sep 10, 05:36 UTC	Sep 11, 05:36 UTC
Wind direction and speed	 2 km/h	 2 km/h	 3 km/h
Temperature and relative humidity	 21°  71%	 21°  66%	 23°  63%

Data retrieved from ECMWF on Sep 09, 05:36 UTC. Calculated at: 40.044°N, 20.787°E.

Event: On August 31, 2026, at 16:00 UTC, in Trapezitsa Mountain, near the city of Konitsa, Ipirus Region, Greece, a fire started due to a lightning, which mainly burned underground. In this moment the fire is ongoing, burning a forest of black pine. A large number of firefighters and aerial means are used for the fire suppression, assisted by municipality vehicles/machinery and volunteer organizations. Copernicus EMS Rapid Mapping is requested to provide initial rough estimation, fire extent and damage assessment emergency mapping.

Data sources and analysis: Pre-event image: Sentinel-2 (2026) (acquired on 12/08/2026 at 09:22 UTC, resolution 10.0 m). Post-event image: Legion @ Vantor (2026), provided by European Space Imaging (acquired on 09/09/2026 at 05:36 UTC, resolution 1.2 m). This image is used as background image. All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image using a semi-automatic approach. Due to dense smoke, the burnt area delineation is not complete.

Map produced by IABG released by e-GEOS on the 09/09/2026.
