Event: On August 31, 2026, at 16:00 UTC, in Trapezitsa Mountain, near the city of Konitsa, Ipirus Region, Greece, a fire started due to a lightning, which mainly burned underground.
In this moment the fire is ongoing, burning a forest of black pine. A large number of firefighters and aerial means are used for the fire suppression, assisted by municipality vehicles/machinery and volunteer organizations.
Copernicus EMS Rapid Mapping is requested to provide initial rough estimation, fire extent and damage assessment emergency mapping.

Data sources and analysis:
Post-event image: Sentinel-2 (2026), (acquired on 04/09/2026 at 09:30 UTC, resolution 10.0 m).
This image is used as background image.

All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image by means of visual interpretation.

Base vector layers: OpenStreetMap © OpenStreetMap contributors (2026), Wikipedia.org, GeoNames 2015, Global Administrative Areas (2012), refined by the producer, Copernicus Global Land Service: Land Cover (2019).
Inset maps: JRC 2013, Natural Earth 2012, GeoNames 2015.
